Summary

Computer Science Engineering student and full-stack developer with hands-on experience building end-to-end, database-backed web applications using React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript, Python, and C++. Experienced in translating use cases into responsive user interfaces, backend business logic, secure application flows, real-time features, and third-party API integrations. Strong foundation in DSA, debugging, Git-based collaboration, clean code, and project ownership.

Education

Chandigarh University — Punjab, India
Bachelor of Engineering in Computer Science and Engineering; CGPA: 8.12 — *2023 – 2027*

Bankura Banga Vidyalaya — West Bengal, India
Higher Secondary, WBCHSE; Percentage: 85% — *2023*

VSNHS — West Bengal, India
Secondary, WBBSE; Percentage: 95% — *2021*

Experience

DSA Intern - In-house Training — May 2025 – July 2025
Chandigarh University, Punjab

- Completed a 6-week training program focused on data structures, algorithms, object-oriented problem solving, debugging, and complexity analysis.
- Implemented solutions involving arrays, strings, linked lists, stacks, queues, trees, graphs, recursion, sorting, and searching using Java, C++, Python, and Git.

Projects

Edu Sphere - Multi-School Management SaaS | *Next.js, Express.js, PostgreSQL, RBAC* — 2026

- Built a multi-tenant school-management platform with secure role-based portals for students, teachers, finance staff, and administrators.
- Implemented tenant-aware PostgreSQL access with row-level security, secure hashed sessions, permission enforcement, audit logging, and APIs for attendance, enrollment, grades, and payments.
- Live Link: edu-sphare.vercel.app

Neo Chat - Real-Time Collaboration Application | *React.js, Node.js, Socket.io, JWT* — Mar. 2025 – Apr. 2026

- Developed a full-stack real-time application with responsive UI screens, secure JWT authentication, persistent chat history, and MongoDB-backed data flow.
- Integrated REST APIs and Socket.io events for reliable client-server communication and instant message delivery across connected users.
- Project Link: pegion-mail.vercel.app

DevMind - AI Chatbot & Code Analyzer | *Next.js, Express.js, MongoDB, LLM APIs* — Mar. 2025 – Apr. 2026

- Built an AI-assisted full-stack platform for coding queries, code review, explanations, and productivity workflows using third-party LLM APIs.
- Developed modular API routes, persistent sessions, prompt workflows, and fallback handling to improve reliability and maintainability.
- Project Link: devmind-omega.vercel.app

Technical Skills

Languages: JavaScript, Python, Java, C++, C, SQL, HTML, CSS
Front End: React.js, Next.js, Tailwind CSS, Responsive UI Development
Back End & APIs: Node.js, Express.js, REST APIs, JWT, Socket.io, JSON, Third-Party API Integration
Databases: MongoDB, MySQL, NoSQL, Data Modeling, Database-Backed Application Flows
Tools & Practices: Git, GitHub, VS Code, Vercel, Debugging, Error Handling, Input Validation, Clean Code, Documentation
Core CS: DSA, OOP, DBMS, Operating Systems, Complexity Analysis, Problem Solving

Achievements

- Cleared university-level selection in Smart India Hackathon for the Government of Kerala - NATPAC problem statement.
- AIMS project selected for the university project expo for its practical relevance, process-improvement value, and implementation quality.
